PROFESSIONAL SUMMARY

Data analyst (M.S. Business Analytics, Santa Clara University; B.S. Statistics) who builds SQL/Python pipelines and Tableau/Looker Studio dashboards on messy, undocumented data.

EDUCATION

Master of Science in Business Analytics, *Santa Clara University* Dec 2025

Bachelor of Science in Statistics, Minor in Data Science, *Iowa State University* Jun 2024

TECHNICAL SKILLS

Programming & Data: SQL, PostgreSQL, Python (pandas, NumPy, scikit-learn, XGBoost, LightGBM), R, PySpark
Visualization & Reporting: Tableau, Looker Studio, Excel, Google Sheets, Streamlit
Methods: Regression, Classification, Clustering, PCA, Hypothesis Testing, Customer Segmentation, Data Cleaning & Quality Checks, RAG, LLM Applications
Platforms: BigQuery, Google Cloud, AWS, Google Earth Engine, Git/GitHub

PROFESSIONAL EXPERIENCE

Data Analyst (Practicum), *X, the Moonshot Factory (Alphabet)* Jan 2025 – Jun 2025

- Owned the water-clarity workstream on a 4-person research team: built a Python (xarray, pandas) pipeline turning 27 years of daily satellite data into a 9,147-row BigQuery dataset and Looker Studio dashboard
- Presented findings to senior public-sector stakeholders, who confirmed the 2.3× clarity contrast between exposed and sheltered coastlines; co-authored the team's technical whitepaper

Research Assistant – Data Analytics (Part-time), *Santa Clara University* Jul 2025 – Dec 2025

- Built a monthly nighttime-light panel (49K+ rows, 2014–2025) from NOAA VIIRS data in Google Earth Engine for a faculty economics study, with data-quality masks and coverage-weighted aggregation
- Produced alternative aggregations and city-level trend charts; documented and reported results weekly

PROJECT EXPERIENCE

Lead Data Analyst, *Casa Grata (Colombia), Miller Center Consulting Program, SCU* May 2025

- Formed and led a 4-person team for a week-long engagement with a Colombian energy nonprofit; built the team's data model from an undocumented 24-table, 48K-record PostgreSQL database
- Owned the collector-performance analysis: showed top collectors by volume were not top by success rate and recommended success-rate KPIs; team placed 2nd university-wide

Injury Severity Classification – Car Crash Analysis, *SCU ML Course Project* Jan 2025 – Mar 2025

- Compared 5 classifiers on ~19.5K crash records to predict injury severity; selected LightGBM (F1 0.744, AUC 0.949) with class weighting and used SHAP to identify top predictors

RAG-Based Course Advisory Chatbot, *SCU NLP Project* Sep 2025 – Dec 2025

- Co-built a RAG course-advising chatbot on a 3-person team, pairing document retrieval with grounded LLM answers; led product design and the web front end, and made the bot decline unanswerable questions

Business Data Migration & Workflow Automation, *Independent Project* Jan 2026 – Present

- Moved a small business's multi-year spreadsheet records into a relational Lark Base system and automated delivery-note generation from orders
